Supplement to the

"Proceedings of the Indian Academy of Sciences"

INDEX TO VOL. XLV—(A)

AUTHORS' INDEX

Agarwal, J. K. P. .. *See* Ramaiah and others.

Agarwal, S. K. D. .. *See* Saraswat and Agarwal.

See Ramaiah and others.

Ahluwalia, V. K., Mehta, A. C. and Seshadri, T. R. — Constitution of Dalbergin, III, 15.

Anjaneyulu, B. .. *See* Muniyappan and Anjaneyulu.

Bakhru, K. .. *See* Basu and Bakhru.

Balachandran, V. K. .. On certain BS-representations and a characterization of complete Boolean algebras, 35.

Basu, B. K. and Bakhru, K. — The input and output system of the T.I.F.R. computer, 231.

Bhatki, K. S. and Radhakrishna, P. — Carrier-free separation of Sn^{113} from indium, 30.

Bhatnagar, P. L. and Rao, S. K. Lakshmana — Problems on the motion of non-Newtonian viscous liquids—general considerations, 161.

Bhatnagar, P. L. and Verma, P. D. — On superposable flows, 281.

Bhattacharya, P. B. .. *See* Khanna and others.

Chandrasekhar, S. .. The optical rotatory dispersion of quartz, 147.

Dadape, V. V. .. *See* Krishnaprasad and Dadape.

Deniz, V. C., Iyengar, S. B. D. and Ramanna, R. — On a time of flight method of studying the velocity distribution of neutrons from diffusing media, 205.

Farooqui, M. M., Srivastava, S. P. and Neogi, R. N. — A two dimensional ferrite-core memory, 240.

Gupta, K. K. .. Non-relativistic approximation of Bhabha's equation, 336.

Iyengar, S. B. D. .. *See* Deniz, and others.

TITLE INDEX

Addition of axially symmetric motions of viscous liquids (Rao), 418.

Bhabha's equation, non-relativitic approximation of (Gupta), 336.

BS-representations, certain, and a characterization of complete Boolean algebras (Balachandran), 35.

Cascade theory, the new approach, numerical calculations on, I, II (Srinivasan and Ranganathan), 69, 268.

Cascade theory with ionisation loss (Ramakrishnan and Srinivasan), 133.

Characteristic roots of the product of matrices (Khan), 84.

Chromatographic studies on the kinetics of the production of caramel (Ramaiah and others), 97.

Collagen, studies, II (Sasisekharan and Ramachandran), 363.

Colorimetric determinations, improvements, III (Khanna and others), 89.

Copper, determination, with sodium versenate, a new spectrophotometric method for (Ramaiah and Vishnu), 113.

Cosmic radiation, primary, solar anisotropy of, an interpretation (Nerurkar), 341.

Dalbergin and methyl dalbergin, a new synthesis, and a synthesis of allo-dalbergin (Ahluwalia and others), 293.

Dalbergin, constitution, III (Ahluwalia and others), 15.

Elastin, structure (Ramachandran and Santhanam), 124.

Electron-photon cascades, multiple processes (Ramakrishnan and others), 311.

Ferrite-core memory, two dimensional (Farooqui and others), 240.

Finite deformation, new solutions for (Seth), 105.

Flows, superposable (Bhatnagar and Verma), 281.

Gums, Indian plant, studies: composition and graded hydrolysis of gum Karaya (*Sterculia urens* Roxb.) (Rao and Sharma), 24.

Heterocyclic compounds, IX (Raman), 260.

Heterocyclic rings containing nitrogen, studies in the formation, III (Rao and Ratnam), 253.

Input and output system of the T.I.F.R. computer (Basu and Bakhru), 231.

Interference, generalised theory, and its applications, III (Pancharatnam), 402.

Magnesium acetate-tetrahydrate $Mg(CH_3COO)_2.4H_2O$, the crystal structure (Shankar and others), 117.

Motion of non-Newtonian viscous liquids, problems—general considerations (Bhatnagar and Rao), 161.

Neutrons from diffusing media, velocity distribution, time of flight method of studying (Deniz and others), 205.

Neutrons in beryllium oxide, slowing down and diffusion (Iyengar and others), 215.

Neutrons in beryllium oxide, slowing down and diffusion constants of, temperature dependence of (Iyengar and others), 224.

Nickel nitrate hexahydrate, optical properties and unit cell parameters (Jayaraman), 263.

Nuclear emulsions, inhibition of shrinkage (Krishnamoorthy), 327.

Optical activity, dependence of, on chemical constitution, studies, XLVI (Singh and Verma), 298.

Polarographic behaviour of metals in ethanolamines, III, IV (Subrahmanya), 184, 195.

Polarographic studies on the composition of nickel ferrocyanide complex (Saraswat and Agarwal), 91.

Polynomials, ultraspherical, characteristic relations (Rao), 172.

Quartz, the optical rotatory dispersion (Chandrasekhar), 147.

Raman effect in mixtures of pyridine with phenol, methanol and water (N - - - H hydrogen bond formation) (Puranik and Rao), 51.

Raman effect studies in chelation (Ramavataram), 47.

Samarium-153, decay (Joshi and others), 390.

Silver iodide dibenzoate, oxidations with, II (Raman), 65.

Slowing down length in ordinary water, determination, using a pulsed neutron source (Ramanna and Navalkar), 74.

Sn^{113}, carrier-free separation, from indium (Bhatki and Radhakrishna), 30.

Solvents, non-aqueous, investigations, II (Muniyappan and Anjaneyulu), 412.

Specific heats of crystals and the fallacy of the theories of Debye and Born (Raman), 273.

Specific heats of some metallic elements, I, II, III, IV (Raman), 1, 7, 59, 139.

Summability, some applications of Banach functional methods to (Parameswaran), 377.

Sums involving the fractional parts of numbers (Swetharanyam), 385.

Uniqueness of maximum pressure for the cubic form-function in the general theory of composite charges (Kapur), 177.

U_3O_8, pure, preparation, from crude sodium diuranate by intermediate complex formation (Krishnaprasad and Dadape), 20.
